

I'm a recent Computer Engineering graduate and a full-stack developer. I focus on building web applications, automating workflows, exploring cloud technologies, and utilizing AI tools to make digital processes faster and scalable.

Work Experience

Full-stack Developer Intern IT Department	Aselsan Sivas Sivas, Türkiye	Sep 2025 - Dec 2025
- Developed full-stack web applications (including portals and automated services) using Angular, Node.js, and PostgreSQL. - Enhanced system security and performance by implementing Role-Based Access Control, AES-256 encryption, and lazy loading architectures - Designed a smart document search engine with Elasticsearch, delivering full-text and fuzzy search capabilities across corporate files.		
GUI Developer Intern	Arkhe Istanbul, Türkiye	July 2025 - August 2025
- Designed desktop application forms using Delphi and the Visual Component Library. - Developed event-driven UI logic, input validation, and form workflows to improve usability.		
Full-stack Developer	Sivas Cumhuriyet University Sivas, Türkiye	March 2025 - June 2025
Worked as part of a student development team at the university library to plan, code, and deploy web-based applications using PHP, MySQL, and JavaScript while refactoring source code to optimize front-end performance.		
Front-end Developer Intern	Ankageo Istanbul, Türkiye	July 2024 - Sep 2024
- Developed interactive prototypes using HTML, CSS, JavaScript, and React. - Integrated third-party APIs and optimized mobile responsiveness.		

Technologies and Languages

- Languages: Java, TypeScript, JavaScript, HTML/CSS, SQL
- Technologies: MySQL, Postgres, Node.js, Angular, Elasticsearch, Git, React
- Other: Full-Stack Web Development, RESTful APIs, ETL & Data Normalization, Process Automation

Education and Certifications

- B.S. Computer Engineering**, Sivas Cumhuriyet University, Türkiye. (Ranked 2nd in the Faculty of Engineering) 2022 - 2026

Projects

- Blockchain-Based Supply Chain Management System** - Authored a senior graduation thesis on decentralized logistics and developed the accompanying full-stack supply chain platform. See the source on Github ([NumuneStok_with_Blockchain](#))
- Document Search & File Management System** - Developed a full-stack document search application integrating Elasticsearch. Implemented fuzzy matching, real-time result highlighting, and multi-format text extraction alongside a responsive file management interface. See the source on Github (repositories: [file-sync-es](#), [file-upload-es](#)).
